

Doon Shore Outdoor Amenity Enhancement Scheme

Part 8: Accompanying Documentation

24th November 2020

This project aims to develop the existing amenity facilities at Doon Shore, to create safer and more formalised parking spaces to cater for all needs, extend existing green spaces to enhance the visitor experience and provide improved pedestrian areas along the shoreline.

The primary motivation for this project is to improve and enhance this area, which is a valuable amenity and tourism resource adjoining Lough Key and the associated Lough Key Forest and Activity Park. The proposed works will enhance the visitor experience and significantly improve the amenity value of this area.

This project will serve to increase the leisure and amenity profile within the County and in doing so will help to strengthen the tourism potential of this region. The provision of a safe, accessible and amenable recreation area will serve as an incentive for tourists to visit this location, which will result in a positive impact on the overall social and economic development of the area.
