

Mote Park :

Vertical Walkway Viewing

Structure

Part 8: Accompanying

Documentation

26th November 2020

This project aims to introduce innovative tourism infrastructure into Mote Park to enhance the visitor experience and transform this high quality natural outdoor recreation resource. Mote Park lies just c.6km from Roscommon Town and is a significant asset to the area in terms of a quality destination for outdoor recreation and amenity.

Mote Park provides an ideal outdoor meeting and recreation facility to serve both those living in as well as visiting Co. Roscommon. This proposal to develop a vertical walkway viewing structure within the park, which will enhance opportunities for increased visitor numbers to the area, through the provision of a unique tourism asset.

This project reflects the ambition of Roscommon County Council to further develop the tourism profile of the County. In striving to maximise the tourism potential of areas throughout Roscommon, it is imperative that the appropriate leisure and amenity related tourism infrastructure is in place to serve communities and visitors alike.
