

# ROSCOMMON: INFRASTRUCTURE

## Locate in Roscommon and Access Global Markets

Roscommon County benefits from strong infrastructure which is based around linking the County to the larger urban areas.

### **Excellent Transport Links [M6, N4 / N5]:**

Major urban centres are easily accessed as the County is served by a world class transportation system including a motorway and two national primary routes. The M6 motorway from Dublin to Galway, N4 Dublin to Sligo, N5 Dublin to Westport. Direct rail links to Dublin allow fast and easy access not only to Dublin but to the rest of the country.

Due to the rural nature of the County people enjoy shorter and less stressful travel times to work and have more time to spend with family and friends.

### **Air Links:**

All major airports of Ireland are within easy reach of Roscommon which is located just minutes away from Knock International Airport. This makes Roscommon ideally placed to serve the needs of international business. Airports at Galway, Sligo, Shannon and Dublin can be accessed within 80 minutes and are accessible using the rail or road network.

### **Housing:**

The County has an available housing stock at reasonable prices by national standards and provides an ideal location to invest, work and live.

## **Broadband:**

High speed quality broadband is available throughout the County – a fact that is essential for the future viability of the County. Fibre-optic cable networks to wireless communications networks are available. Broadband providers operating in the county offer fixed and wireless broadband and the availability and quality of broadband is of a high standard. In County Roscommon almost 100% of the population have access to broadband services.

A Metropolitan Area Network [MAN] operates in the key business and commercial urban areas of Roscommon, Monksland/Athlone and Carrick on Shannon.

## **Energy, Water, Wastewater:**

The County also boasts an efficient, resilient energy infrastructure, a quality water supply and waste water infrastructure – these are key factors for regional business development. The capacity to fulfil the energy requirements of all types of industry, even those with heavy energy demands, has been built into the County's network.
