We, the Committee appointed on the suggestion in the letter of the Minister of Local Government and Public Health dated the 9th January 1926 to examine and report to the Council in detail on the subject of travelling expenses to Members of the Council herewith submit our Report:-

"The Minister states prior to the passing of the Local Government Act 1925 no allowances were paid to Members of County Councils for attendance at Meetings, and such allowances to voluntary workers in Local Government services are quite exceptional in the legislation of other Countries.

We are aware of this fact and we also know that until comparatively recent years no allowances for travelling or otherwise were given to Members of Parliament etc. who now receive not only first class travelling expenses but subsistance allowance as well, even when not engaged in Parliamentary affairs, and we say that such provision as has been made for the payment

of certain travelling expenses to voluntary workers in Local Government services has not been made as the result of the demands of County Councils but by the voluntary act of the Oireachtas.

The Minister is no doubt aware that the Amalgamation Scheme forced upon the country has seriously increased the burden on the private time and financial resources of the Members of the County Council and in particular the Members on the Board of Health. It would also the present allowance of four Members travelling together all the way to pay for a Car, but owing to the scattered positions of the various residences a direct route is an impossibility and even on the unavoidably indirect route a full load is often not obtainable because all the Members thereon are not able to attend a Meeting, or because of the small number of Members available in the case of Bodies such as the Mental Hospital Committee or the Board of Health which have comparatively few Members.

The

We offer no apology for the demand that the travelling allowance for all Members of the Council should be made for the return journey at 5d per mile or otherwise that the Members of the Executive for the sake of National economy should adopt the principle as they law applied it to the County Councils
